

TMMi® – Test Maturity Model Integration Professional

The TMMi® Professional certificate is an important aspect of the overall TMMi® program with the goal to develop a more mature and controlled process of software testing. Gradually TMMi® has become an independent and industry recognized model for the assessment of testing and quality related processes.

The new certificate is aimed at everyone who wants to have a basic understanding of the TMMi® model. The training takes 2 days.

A TMMi® professional is able to:

- Explain to management the business importance of test process improvement
- Guide and advice an organization or project when using the TMMi® model as a basis for their test process improvement
- Providing support in the interpretation and understanding of the TMMi model, including the relationship of the TMMi® to the CMMI model
- Act as a co-assessor in informal TMMi® assessments
- Participate in programs for improving the test process within an organization or project and can identify critical success factors
